Hi

Im looking so unpatiently for an answer to the question: how can I change my user in renegade and renguard.

I use to play on my user "Houston"
In renguard it still says something like "Welcome, Houston!"

But in-game when I login (there's an auto login) it gives a message of the day
"Error: Nickname deleted"

I get an empty server list.
If this is fixable please explain how, otherwise I would like to make a new user to play on jelly servers or any famous server like the old days.
How do I make renguard change the user?? It keeps saying
"welcome, Houston!" is this a IP-recognition or something?
How to I dissable the auto login in Renegade?
(it keeps login in on Houston)

Some help would be great
sorry for the crappy english btw.
