i think i have a way for you guys to "lock" you mix files (but not pkg   )I have been "developing" it for some time now...if i manage to finish it the XCC Mixer simply WONT be able to read the mix file-it will be identified as "Unknown".However you`ll have to keep a backup of the Non-Unknown version for update purposes or you might get a bit angry at me and the method   Anyways,expect it to be finished soon!
