I think ACK haxx0r3d Crimson's account and is trying to take over the whole Renegade forums community starting here! Ohh noes!!!!!!!!!!!!11111111 one one one one one

I think that was kind of silly that Crimson actually went along with that, I mean, what's the point at all, about %98 of the people Refer to ACK as AC*K (without the word filter audviousley) Now all we have to type is AC*K, great word filter, people will just add random letters, or characters either infront, or behind AC*K just so that they can type it like that. The word filters would be funny to mees with for an April fool's joke though, turn they into thems, skin to texture, Crimson to 1337357 \/\/3b/\/\45t73r 3\/3R (1337est webmaster ever), turn AC*K or Aircraftkiller into Grammer Nazi!

EDIT: A few little problems I fixed up real quick. . .
