TwA-DanI have about £500 for spending on upgrades

I'm going to just buy an X800 Pro, that should last me a good few years for the good games. The games I have my eye on are Doom 3 and Half Life 2. I've got to start saving for University soon, I dont want large debts.

I passed the state's educational assessment program (MEAP). I get \$2500 over the course of two years, so I get half my community college paid for, basically. So that leaves me a lot of money for upgrades
