zunnieSlashx87I noticed that I had some errors inputting my serial number in. Is there anywhere I can change it? I don't wanna re-install the game...Can you edit the WOLData.key file? It has numbers in it...

Whats the matter dude? You got serial banned or something?

[zunnie]

Must have. If you have some errors inputting your serial, the setup program wouldn't allow you to continue until a valid serial is entered.

So that leaves two options:
[list]Serial Ban, trying to evade...
Warez version, trying to get a serial that'll work with WOL... (good luck)[/list:u]
