Subject: Why Renguard partial mode is best.

Thier are 2 kinds of cheaters:

Blatant Flamboyant type: Uses FR up the ass, wants everyone to know he is cheating, waiting to be banned.

Smart Cheaters: These sobs are the worst, they cheat just a little bit but try to act as if they are not cheating... e.g. they'll have bighead enabled, but will shoot at your feet, then for a split second shoot your head. You know this because the split second they shot your head feels like you just got snipped rapidly.

Partial renguard is good for getting rid of cheater no.2. If server admins suspect a smart cheater, simply force him to run renguard. The crackhead cheater, simply ban.

I know people are gonna say what about cheater no.1 when no mods are present? That is why we have brenbot and other server manager programs. Almost all of them have some type of voting feature to kick people, use that. Hopefully new version of brenbot will have a 2 hour ban on people that get vote kicked for cheating.
