ok ok ok, heres what i have done.....
I have deleted my FDS folder and reinstalled it, i have made it see my irc channel but other than that it is a fresh install, i installed all the files for bhs.dll and the scripts to c:\westwood\renegadeFDS\server and i have also put a mod "objects" into the c:\westwood\renegadeFDS\server\data folder, when i load the FDS it now doesnt list on WOL, however when i take the objects folder out it does list on WOL. Please someone help me, i cant keep asking zunnie coz i bug him enough allready and hes been very patient try to sort it out for me, but he is very busy. Would someone mind taking remote of my computer and seeing whats going on for me please? It really would be appreciated allot
