Doesn't affect anyone else but myself. Call it pathetic and petty all you want but its my browser, my computer thats viewing it... just like its your website thats hosting it.

I didn't care much seeing a Bush logo on the sidebar of n00bstories, just like I didn't care much about seeing a Kerry logo in Superflyingliberals signature.

Doesn't hurt anyone and actually saves a whee bit of loading time as well, because it doesn't have to load those images,
