icedog90It is necessary if Gamespy is really that gay.

Software does not have a penis not does it have an obsession to go into a male anus.

DID gamespy BUTT-FUCK you? DId you suck Gamespy penis? if not then its not gay, its just badly coded. 1.41 version of gamespy was great, but 2.0 has done something very retarded and effects all wolspy servers...

2ndly, gamespy in general > any other online gameplay service, it's technology powers 95% off all NON pay2play online (MMRPG/XBOX live) games for not only pc's but even ps2.

Some games that use gamespy technology:

-Ut, ut2004, bf1942, cod, wolf ....

I could go on and on. Not to mention Renegade runs better in gamespy and is more stable for the dedicated servers software then wol (which happens to be offline half the time)
