After installing CP1 next day i had a lil renegade problem all the wol servers were gone (and no I didn't have a .ddb file or any other cheat in the \data folder and was on renguard at the time). Also when the srevers list was gone and i hosted a game the loading screen was back to the original one i tried the LAN and SP practice and the load screen was the og one there also.

I reinstalled renegade and now I can't get the CP1 then I go to bata test it takes me to the "Beta Tester Report" can i get it resent to my RenGuard.
SN: Ghost911x

Edit: Deleted renegade folder reinstalled it from scratch installed renguard and it worked. Renguard reinstalled CP1.
