The Allied Medium Tank, initially given to the Allies through the Lend Lease program (authorized by the United States Congress), is the mainstay of Allied armor divisions.

It has strong armor, a powerful cannon, and is faster than the Soviet Heavy Tank - making it the best all around vehicle in the game.

Used in groups, the Medium Tank can absorb fire and dish it out equally well. Use them to your advantage for quick, decisive attacks with Artillery and Light Tanks backing you up.

Vehicle geometry was created and upgraded by Sir Phoenixx. The two texture maps are my work.
