Comparing it to the picture, the hood should be more angled (less "square", more "triangular")...the hood in the one in the picture is wide near the windshield base, and is less wide in the front (I have actually seen a truck that looked just like this and the hood looks like the one in the first pic). Also the tires need to be larger/fatter like the ones in the first pic.

Thats about all I could find "wrong" with it, It's a good model, I was strictly comparing it to the vehicle in the first picture.
