Nah it's not just hourglass. It has happened a few times on my clans server over the last year. It is quite rare for it to happen though and somethimes only certain players will see it with no wheels. My clan firend has a screenshot of me driving an arty on mese with no wheels even though i know it had them. It is quite funny when it happens though. The things i have seen it happen to are:

Nod APC with no wheels

Nod APC with just the middle wheels on each side

Nod Buggy with no wheels

Nod Arty with no wheels

Nod & GDI Harvesters invisible or have no wheels

GDI Hum-vee

I did notice that this seems to happen a lot on Hourglass, Mesa and Walls a lot though, when it does occur. It only seems to happen to wheeled vehicles, don't know why it happens, just some random thing i suppose. This is just one of the weired or fun bugs that happend in renegade sometimes.
