Burn! I've Been Thinking...

Uh oh! Run For your lives!!! Save yourselves!!!

Only joking

I reckon online cheating is becoming ridiculous. I just played in the only server anywhere near full at 1:15 and there were about 5 obvious cheats in there.

Then half of the rest were noobs leaveing the other 30% to be good clan players.

Renegade is slowly being absorbed by utter noobs and cheats. Thats why I'm so glad renguard stops most. Only reason this server was so full of cheats was 'cause they were running partial mode or half-mode or whatever its called.
