Yup,its for the snowfight map which is almost complete for my BETA testers

I might just keep the infantry on top of the vehicle like that in the piccy above

Because Snowfight is all about having fun

I am also going to include the E3 Flame Tank, Hover MRLS, HUMTOW (I was going to include the Commando Hummer until I saw it was like 3000 polys) and the Renegade2 Mirage Tank (re-skinned/textured)

I hope when it is released that everyone plays it on there servers to get into the Xmas Spirit
