I download rengaurd and the core patch,but i keep getting a message in -BiO- Logical-Warfare and a few other servers.The message says you need to download rengaurd at http://www.rengaurd.com blah,blah,blah.Everytime it pops up while playing and makes me get killed etc.I was wondering if there's anything that could get rid of this error or bug so it will stop doing this.Alot of other players say it does it too them as well.
