RexWestwood added an automatic kick a long time ago.\

It kicks you if you stay in the (how do you call that screen?) for too long.

The page i mean is a screen that pops up after you click on a server in the advanced listing. It's a screen with the player list. In the right bottom there is a button to connect/join the server.

If a person idles on that screen for too long, that person will get kicked.

team selection screen?
