I addressed this more specifically in the FAQ/Rules thread. John Shaft contacted me about his sig and I explained that, while being very cool and within the physical dimensions of the guidelines, it was just too much data for folks on less than speedy connections to download in a reasonable amount of time.

Sk8rRIMuk, your sig is even larger at ~2.5Megabytes. My broadband connection barely notices it, but there are quite a few people here on 56k, or crappy ISPs and a 2.5Meg .gif file is a lot to swallow. I know it's cool but please find something smaller.
