---

ATI made some chipstes for p4/celeron

he probly has a integrated gfx. (doesnt have to be a laptop)

if u have the celeron northwood.

they only have like 8 l2cache,and like 128 l2cache.

STILL the loading time shouldnt be taking that long.

even a p3 -1000 mhz with 512sdr can load renegade in 3-4 seconds.

Turn of unneseccary exe's in the taskmanager.

turn of virus/scanners and stuff.

...hmm if that doesnt work, try a format
