which ever burning software your using..

when you browse for the file u want to burn.. it will say which file formats u will need to convert it too..

nero needs bup - vob - ifo formats

my one stop shop for apps is
<http://www.download.com>

just search for convert avi to (w/e file format u need)

and i THINK.. thats all there is to it.. lol
ofcourse u may need to convert it once from avi to something else..
then to another format thats burnable
