easy way i found is to have a vid card that outputs DV --

send it to a DV camcorder

then edit it on the pc at your pleasure...

which is what i did for Dante's promo --

and all the video's i made for General's during the MPT.

I use DivX 5 plugin - VideoWave - Lamer - VirtuaDub - MP3 Doctor - the list goes on -

i use what it needs to get the job done.

here is a link to get all the stuff you need:
