SuperFlyingEngiA fully developed human child is not always the result of an egg being fertilized. Ever heard of a miscarriage?

By the way, carbon is the chief atom of life, in case you didn't know.

I should have put that in there knowing that you'd jump on it, but alas, I figured you would have some common sense.

Yeah, you're a brilliant one there, buddy. OMG DIAMONDS ARE MISCARIAGES. OMGOMGOMGOMGOMGOMGOMG. HOW SAD. YOU CAN'T WEAR DIAMONDS BECAUSE IT IS DEAD EMBRYOS. YOU SINNER. OMGOMGOMGOMGOMGOMG. :rolleyes:

Yeah, I know Carbon is the basis of all lifeforms. I've taken basic Chemistry courses in high school, and I am acing my Basic Chemistry class at college too (it's SO easy...I should have gotten into the next higher one).
