Start Number..   5678
Answer = E26
????

is this Decimal to Hexadecimal conversion?
well you got it 100% right except for a lil part
5678=162e

Start Number.. 5678
5678 / 16 = 354.875 = 354
354 * 16 = 5664
5678 - 5664 = 14 = E <<last digit

New Start Number.. 354
354 / 16 = 22.125 = 22
22 * 16 = 352
354 - 352 = 2 = 2 <<2nd to last digit

New Start Number.. 22
22 / 16 = 1.375 = 1 <<new number is less then 16 so it's the 1st number
1 * 16 = 16
22 - 16 = 6 = 6 <<3rd to last digit
162E

first learn something b4 you show of your INCORRECT skills, lol
    WANNABE, YOU GOT OWNED

Quote:do any of you know ASM, VB, C++, binaary, hex, decimal??? yes I know them all. But i
think that knowing "binaary, hex, decimal" is almost pointles because ther are 100000 or difecent
converters that you can use. No need to spend 3 mins trying to find that 10010001 11001001
01010101 is in hex just copy and pasete (10 secs)
 and you get 91 c9 55.
