maybe wen you sent me a good configuration its work better but I set Server.ini the same as a jear ago with brenbot 1.35 or something and that works fine.

BTW; When i set the server on snipermaps under_sniping.mix etc the big boxes arent there. is this because there is non configutation for this map in server2.ini ??? if that is it maybe i can see when i removed some map config there the server goes better it's maybe an Idee.
