I would like to make a legal pursuit against Jonathan D. Holmes for using private work of my mod and posting it on the internet.

How should I start this ?

http://dynamic6.gamespy.com/~renalert/forum/index.php?showtopic=5959
He is making fun of something I didn't released for good reasons...

I took a screenshot of the page, and recorded the source so I have proof. Now I want to go further and have him to the court.

I never gave my permission to JD holmes to use or download any of my work. He has to pay.

They used a hack on phpbb (2.0.13 needed or you will be hacked too) to gain access to internal board, thx god they think we use only that place and so found only old files it seems...)

Quote:Hi everyone,

phpBB Group announces the release of phpBB 2.0.13, the "Beware of the furries" edition. This release addresses two recent security exploits, one of them critical. They were reported a few days after .12 was released and no one is more annoyed than us, having to release a new version in such a short period of time.
Fortunately both fixes are easy and in each case just one line needs to be edited.

The first issue is critical (session handling allowing everyone gaining administrator rights) and we urge you to fix it on your forums as soon as possible:

Open includes/sessions.php

Find:
Code:
if($sessiondata['autologinid'] == $auto_login_key)

Replace with:
Code:
if($sessiondata['autologinid'] === $auto_login_key)

A second minor issue reported to bugtraq several days ago was the path disclosure bug in viewtopic.php which got fixed by applying the following steps:

Open viewtopic.php

Find:
Code:
$message = str_replace('\"', '"', substr(preg_replace('#(\>(((?>([^><]+|(?R)))*)\<))#se',
"preg_replace('#\b(" . $highlight_match . ")\b#i', '<span style=\"color:#" . $theme['fontcolor3'] .
"\">\\\\1', '\\0')", '>' . $message . '<'), 1, -1));

Replace with:
Code:
$message = str_replace('\"', '"', substr(@preg_replace('#(\>(((?>([^><]+|(?R)))*)\<))#se',
"@preg_replace('#\b(" . $highlight_match . ")\b#i', '<span style=\"color:#" . $theme['fontcolor3'] .
"\">\\\\1', '\\0')", '>' . $message . '<'), 1, -1));

As with all new releases we urge you to upgrade as soon as possible. You can of course find this
download available on our downloads page. As per usual three packages are available to simplify
your upgrade.

I see my uncle this afternoon, he is a judge at the european court.

Anyway, you have still a few hours to remove the pic and tell us who did that or we will have to
attack you. I removed you from ignore list to get your answer. The ball is your camp now. Move
ya ass.
