Unless v00d00 shows up or I can otherwise get some help, I wont be able to make the pistol reload work.

But, I do have another surprise in store. I have made the infantry death sound and powerup collection sound play on the client (only if both server and client have bhs.dll 2.1) and plan to make the infantry hurt sound play on the client too (its just a matter of writing the right ASM hacks and stuff to pull it off).
