thanks Dethdeath,

but now i have again a problem with the auto-update of renguard, will i use the most recent version of renguard and the 1e core-patch is already installed. I can press renegade, but then i get a error that it is incorrectly installed.

So if someone knows a way to fix this, i real would like to know, if been trying for 7 days now to correct this, wenn i re instal it works, but wenn i log off and come back later (2 hours or a bit more), this happens to me.
