Okay lets start over...

This way lets you get a copy of BRenBot by installing CP 1.3 to a dummy copy of your server

Steps:
1. Copy your FDS folder to some other place (the dummy)
2. Run CP 1.3 installer
3. When selecting installation place, select the folder that you copied (the dummy)
4. Install to that dummy folder
5. Wait
6. Once done go into the dummy folder and cut the BRenBot 1.41 folder
7. Paste the BRenbot folder into you real FDS folder

If you still need help just ask.
