Generally, the only time i save, is at the very beginning. I play in the Unrules New Maps server, and so i start off with 350. Only takes a moment to get a Sniper, and i rarely go for a Ramjet Sniper, so i dont have to worry about losing a major amount of Credits. Occasionally, ill get a Technician/Hotwire and start mining the base, but usually theres more then one person doing that. Theres one map that i think they should remove. Its the rather small map, two bases on plateaus with a large canyon separating their rear entrances from each other, however theres a bridge on the GDI side, and a ridge on the Nod side. You can never mine all the buildings on the Unrules sever!
