Woah woah woah...someone translate for me

So you're saying you uninstalled Ren and RenG and it still shows RenG in your system?

You might have not clicked remove all components of RenG and just did modify,or your computer is still getting rid of it.Normally if your computer is low on diskspace and memory it takes a while to get rid of the newer files.This happened to my friend a while ago,all he did was scan his computer for RenG and it dissapeared.

There I took about 3 minutes to do that and I hope it helps you.
