Subject: Error while starting Rengaurd
Posted by RHINO on Thu, 11 Aug 2005 13:46:22 GMT

The first time (and all subsequent times) i tried running Rengaurd (v. 1.03) failed, because:
--"Buffer overrun detected! Program: D:\Games\Renegade\Game.exe A buffer overrun has been detected which has corrupted the game's internal state. The program cannot safely continue execution and must now be terminated."-- No, i fixed my firewall already. Yes, i do have the latest version of Renegade. Yes, i tried Un- and Re- installing rengaurd 3 times.
If you have any ideas (and know what you're talking about) they would be appreciated!
                    --Thanks--
