At the start, with the first versions of RG there were some easy ways of bypassing it but now no real proove exists someone still does it. There was on RG-bypass, made by p*nkb**ter, but 10 minutes after its release it was patched . IMO the worst days spent by p*nk on that lol...

There's not such a list availlable. If it got names on it, it would prolly just draw people towards it, trying to get on it.
