Ok Dunno if this has been asked before, But pdxg severs keep kicking people from the game saying: Disconnected from the Renguard Network....
A couple of times it has happened to me and Renguard gives me an error message saying Error in Memory Allocation.... Other times it has told other people that they have used the lan exploit.
Since RG has only just been added to our servers bot and this is a recent thing (hasnt happened to me on NS or anyother server) Im wondering, is this a client side or server side issue?

It's just kinda annoying.
