Try using it on a laptop and play a game, ow let's say renegade?

It uses enough CPU to make my AMD 3000+ get constant FPS-spikes. And yes I used it. And yes, it has let virusses get passed on me.

Maybe you think and read before you post?

And maybe you could think we aren't all that lucky to get software for free?

You are completely free not to take my advice, that's why it's called advice.
