Quote:BTW, Just because the 7800 GTX has more pixel Pipelines than a X1800 dosent mean its more powerful.

Here are some links to get the new 512 MB version of the GTX.. get ready to pay up

Lets think about this logically.. the more pipelines the better right being as it can transfer more data, If the ATI's 1800 only has 16 pipelines while the 7800GTX 512 has 24 and higher specs, meaning that it can transfer the data faster while transferring more at the same time.

Its like cars.. as in lets say you have a car that costs \$200000 and a car that is 250000 (200k being ATI and 250k being NV)

The 200k only goes 160MPH while the 250k goes 210MPH which car is going to get you from A - B faster?

Its the same with the Pipelines on the card.
