Like I said.. I hardly care, it's more of your business and i'm not going to waste my time just to ban some dickhead. Besides, what's proof? How am I going to prove with a screenshot that some guy uses big head? even if a guy did happen to shoot me behind a wall where my head could stick out, it could still have been lag. So like I said, I'm not even going to bother with it. Final renegade --> leave; Big head --> buy a tank/vehicle and hopefully aim for the guy who cheats and kill him multiple times and hopefully he'll leave in frustration of how bad he plays. As for pollkicking - it loses it's effect when a person can rejoin in few seconds flat. Hence why if a cheater was in at least a half rg.. forcerg is a more permanent solution to a problem, unless of course the cheater decided to be like any good player and not cheat. Yeah, right.
