be a tech or hotwire, go to someone and placea lot of mines on them, have him go into the apc and mine the apc with as many mines as you can, take the apc and drive to a enemy vehicle and try to run into it and you'll explode, your character will still be alive so run to the nearest enemy or enemy base and run into him/her like a crazy maniac. another good way is to have a stealth black hand and you'll be looking like a bunch of floating mines.
