Ive gone thru that sticky @ the top of the forum but it still don't work, were you remove/add the (tm).

Ive Tried manually installing it, go in game i say "!rg ____" and it says "____is NOT Using RG."

So any suggestions on how to install?

OK I've installed it but now when i try to change weapon it does stupid dance moves how can i stop them?
There's a file named "keys.exe" or something like it in your renegade folder. Change the taunts to buttons you don't use to play. Or search "keys.txt" (something like that) in your data-folder and delete what's in it if you think you don't need the taunts.
