I load up renegade then renguard comes up so i click on "renegade" and then the main menu comes up i go on "multiplayer internet" then "westwood online" then when i click on "advance battle listings" it crashes. I try to get out of this by pressing "Alt" and "F4" but it stays up on the screen so the only way is to turn the pc off by the switch. Please help i really wanna go on renegade i havent been able to in months because i just got my pc fixed. I have attached my dxdiag file.
