Sorry For Triple Posting But, i Only ever made 1 "cheat" for Single Player, that was giveing Nod No heads Or These Bigs spikes through them , it was kinda funny, just i didnt have to kill anyone with Nod haveing spikes ^_^ but in multiplayer i would never cheat, i Have never been banned, and when i joined Kamuix server, he was saying something, i got spiked with first start lag then literly 2 seconds after i was banned for "F^^^ You" now on that link, r3dsworld.com , on my sig, it says MPHater, Now That was a joke to p^^^ a few ppl off, But Havoc the dude who banned me and just blaintly accused me of cheating, is in the MP clan, Now i think i did my job at P^^^^^ him off , But no need to wrongly accuse a inocent player of cheating, and if you still dont belive me, join me when i play on xphaze marathon, about 7-8-9 american Washington DC Times , and you can watch me, Test me for every cheat there is

But i would only prove you wrong about me not cheating.

Also i use Level Edit to make or and edit Maps for friends, or i just wana test something's out.

Also Havoc (the dude who accused me of Cheating)

i realy don't Give 10 f^^^^ if you think i cheat, i have a few friends who play renegade with me, they know i dont cheat and thats all i need to know, i'm trusted by pleanty of people , so your acusation doesnt bother me,

The reason i posted these Screen Shots was to prove i dont use Cheats in any form nor do i encourage cheating or Hacking.

to who it realy cares
