The idea is that you cheat yourself because you're given a handicap. If given answers for a test for the rest of your life you wouldn't have to do anything for studying to do good. Unfortunately you'll be a dipshit your entire life if you don't study and learn.

Same goes with gaming in that if you cheat to do better you're using a handicap to be better in the game. You get accustomed to using a certain cheat, that if you stopped you would have to get use to having to actually do normal damage which you wouldn't be used to.

Or as said it could be in a matter of playing single player and not enjoying the entire game if you had to use cheats. Say for instance having to cheat to beat Goldeneye64, or something.

who ate all the doughnuts?
