Dr. Lithius wrote on Fri, 30 June 2006 09:54I have recently developed this exact same problem! And it happened after that last Windows Critical Update where it puts something on your machine to see if your copy of Windows XP is "authentic" or not... Coinsidence? Maybe. I dunno. What really gets me is that they give you a "TXT" file that's actually not a TXT file...but an XML file, so I can't copy and paste everything the damned error report says... Freakin' Hell...

Anyway, here's my specs:Quote:Manufacturer: Micro-Star International MS-6380E(v1.3) ATX Mainboard
Processor: Intel(R) Pentium(R) 4 CPU 2.40GHz
Memory: 768MB SDRAM(Possibly curropt.)
Video Card: NVIDIA GeForce FX 5700LE
Monitor: ViewSonic E70-10
Sound Card: SoundBlaster Live! v5.1
Speakers/Headphones: Multimedia Speaker System(Generic)/Coby CV-H42 Headphones
Keyboard: Logitech Wireless Desktop Keyboard
Mouse: Microsoft PS/2 Port Mouse (IntelliPoint)
Mouse Surface: Generic Mousepad
Operating System: Windows XP Professional (5.1, Build 2600) Service Pack 2 (2600.xpsp_sp2_gdr.050301-1519)

So...M$ broke RenGuard for certain XP users! Pathetic. Absolutely Pathetic on M$'s part. BHS shouldn't have to put up with crap like this. P.S. it's been a while since the last update, how's RG 1.04 coming?
