you mean if you switched "UN" with n00bstories? maybe. but that'd have more to do with the fact of insulting the server. If it just said "fuck fuck fuck fuck." I'm quite sure
1. They wouldn't ban for it.
2. Even if, I'm sure a ban won't be the first measure.

The language rule was probably more leaning towards excessive and racist language more so than saying words like fuck and shit. Point is, n00bstories won't ban for venting frustration with words like "shit", while UN will.
