ok i need help, im new here but ive been playing renegade for a long time, and i have renguard version 1.03 and this is what is says when i try to get cp2

RenGuard has detected corrupt files. In order to install core patch 2, you need to download fixed copies and extract them to your renegade directory. Mix files (maps) belong to the data directory.

Click on these download links, unzip the files and put their contents in your Renegade/data directory to overwrite your files that do not match our expected profile, and when your done restart RenGuard.
