i have run into a problem that i cannot solve:

if i ignore the error i can telnet port 3002 and send data over fine the fds will print it. so why do i get it?

```
#include "Socket.h"
#include <string>
#include <windows.h>
using namespace std;

DWORD WINAPI parse(LPVOID lpParam)
{
    SocketServer in(3002,5);
    while (1)
    {
        Socket* s=in.Accept();
        while (1)
        {
            std::string r = s->ReceiveLine();
            if (r.empty())
                break;
            Console_Output(r.c_str());
        }
    }
    return 0;
}
```

if i comment this function body out(except "return 0;") it will not error.

here is the SocketServer code: <http://www.adp-gmbh.ch/win/misc/sockets.html>
