These are the maps currently included in the mappack that The KOSs2 will make availlable for download as one zip-file soon.

This basically are all .mix-files in my own data-folder. I am aware I don't have many of the real new maps. Therefor I ask you which maps you'd like us to add.

The only thing i need is the link to where to download the .mix - file.
The download will be availlable in one week, so please reply before the 1st of september.
