Subject: Unable to Conect

Ok, this is wierd. Everytime I log on to renegade with either of my pc's, it gives me that...one pc has renguard, one doesn't, but both have. Up until yesterday, everything was working fine on both, no problems. Now, every time I login, I gives me that. The weird thing is, Renguard IS able to connect (and I can go on the internet, obviously).

A little help?
