The bad firing squad might just miss, or hit something non-vital. Worst case scenario, they get a gut shot and you lie there in agony for half an hour or so while you bleed to death.

The Obelisk would be quick and painless... and save you quite a bit on funeral arrangements.

The AGT would...well, it depends on whether you want to use the TD AGT or the Ren AGT. The TD AGT would blast you with a missile... the Ren AGT is a bit of a meat grinder. Not that it would matter much, as the end result is the same- one less ape running around on planet Earth.

So the firing squad offers the best and only chance of survival, but the greatest chance of lying in pain for a while before checking out. The Obelisk offers the best chance of getting it out of the way fast, since you really wouldn't feel the laser in the half-second it took to vaporize you. The AGT would kill you surely enough, but how is a completely different story.
