JavaxcxAfromn96what about "BB guns" i shot a cat with one

Abusing animals is one of first signs of insecurity.

i dont abuse animals i actually like animals very much but his cat crawled into my parents car and scratched the leather all up and then it freekin attacked my friend and he now has a scar on his face and no he didnt provoke it, it also drives my dog insane all the time and ripped up my brand new pair of Etnies(really nice shoes).
