Personally, I never temped any of these presets so I do not know if it will work if you temp them. And to add the reflect script and change its ID, go into the "Instances" tab, open "Object" open "Vehicle" select the invisible box and click the "MOD" button.

And 1 more thing: You put two JFW_Send_Custom_Distance_Objects_Custom in the soldier with the flashlight. Is it meant to have 2 of them in one soldier?
Yes put two.
